EXPANDING THE REGION'S MOST COMPREHENSIVE CARDIAC AND VASCULAR TEAM

We are excited to welcome several accomplished specialists to the Guthrie Cardiac and Vascular Care team. Their expertise enhances our commitment to providing exceptional cardiovascular care for patients in our region. Please join us in welcoming the following providers who recently joined the Guthrie Cardiac and Vascular team.

Ravi Akula, MD, MBA, FACC, FASNC
 Lead, Cortland and Ithaca Cardiology
 Non-invasive Cardiology
 • Guthrie Cortland
 • Guthrie Ithaca Hanshaw

Jorge Davidenko, MD
 Non-invasive Cardiology
 • Guthrie Cortland

Mukesh Sharma, MD
 Non-invasive Cardiology
 • Guthrie Cortland

Syed Hamza Waheed, MD
 Non-invasive Cardiology
 • Guthrie Binghamton
 Riverside Drive

Umut Gomceli, MD
 Non-invasive Cardiology
 • Guthrie East Corning

Owais Ahmed, MD
 Interventional Cardiology
 • Guthrie Binghamton
 Riverside Drive

Chanderdeep Singh, MD
 Cardiothoracic Surgery
 • Guthrie Sayre

John Sadeghi, MD
 Cardiothoracic Surgery
 • Guthrie Sayres
 • Guthrie Binghamton
 Riverside Drive

GUTHRIE CARDIOVASCULAR FELLOWSHIP PROGRAM

The Guthrie Cardiovascular Fellowship Program was established in 2010. The three-year program trains fellows in all aspects of Cardiology, including heart failure, arrhythmia management, and noninvasive and invasive imaging. Cardiovascular trainees have found a strong and engaged faculty that takes pride in what they do with a desire to teach.

We are excited to announce that our fellowship program has recently received approval to expand from two to three fellows each training year.

Fellowship Leaders

I am proud to have served as the Program Director for the Cardiology Fellowship since 2012. Our trainees are the future of Cardiology, and the bidirectional teaching and team enhancement have allowed Guthrie to provide exceptional care to the communities that we serve.

- Daniel P. Sporn, MD, FACC, MHA, Program Director

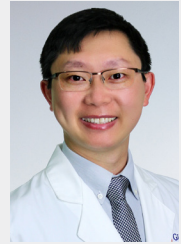

Sudhakar Sattur, MD, MHSA
Associate Program Director

From Fellows to Attendings

Michael DePersis, MD

Hao Yang, MD

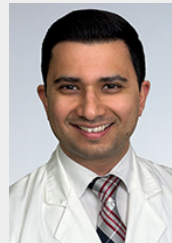

We are excited to announce that **Dr. Ahmad Naeem Lone**, a 2024 fellow graduate, and **Dr. Hammad Ur Rahman**, a 2025 fellow graduate, will be joining our Guthrie Electrophysiology and Interventional Cardiology Teams, respectively, in 2026.

Dr. Sudhakar Sattur, Chief of the Guthrie Medical Group Cardiology Department, and **Dr. Amber Hussain**, Director of the Guthrie Medical Group Vascular Lab, are notable examples of this tradition. Dr. Hussain completed her general surgery residency at Guthrie Robert Packer Hospital, while Dr. Sattur went through our cardiovascular fellowship program. Their training created a strong foundation for their careers, and both have since become integral parts of our cardiac and vascular team.

We cultivate skilled physicians who choose to build their careers here, contributing their expertise to our community and enhancing the quality of specialized care available to your patients.

» WHAT'S NEW:

We are pleased to announce that **Amber Hussain, DO, RPVI** has been appointed as Medical Director of the Guthrie Vascular Lab. Dr. Hussain brings exceptional expertise to this role, graduating second in her class from Lake Erie College of Osteopathic Medicine and achieving top national scores during her vascular surgery fellowship.

As Medical Director, Dr. Hussain oversees vascular lab operations at seven outpatient locations and Robert Packer Hospital, ensuring quality and expanding services across the Guthrie system.

We also welcomed our newest vascular surgeon, **Matthew Chang, MD, RPVI**, to our team in 2024. He is providing vascular specialty services to patients in person in Ithaca and Sayre and via telemedicine in Cortland.

Connecting With Our Community Partners

Dr. Sampson and Dr. Hussain met with local primary care providers to strengthen our collaborative health care network. Building strong relationships with PCPs and referring providers is essential to ensuring seamless, coordinated care for our shared patients. During their outreach, they paused for a photo that captured the spirit of their community connection. Their dedication to fostering these vital partnerships helps us deliver comprehensive care and improve patient outcomes throughout the region.

FELLOWSHIP TRAINING AREAS

INTERVENTIONAL CARDIOLOGY, ADVANCED IMAGING, ELECTROPHYSIOLOGY, HEART FAILURE, VASCULAR AND ENDOVASCULAR SURGERY, AND CARDIOTHORACIC SURGERY

*Fiscal Year 2025

■ **PHILIPS AZURION** imaging systems are designed to help clinicians work efficiently by reducing preparation and procedure time, enabling more patients to be diagnosed and treated. The systems provide high-quality imaging with excellent visibility at low-dose levels of radiation.

■ **THE HEART AND VASCULAR CENTER** is a 17,000-square-foot space designed to deliver care for even the most complex cardiac and vascular conditions including cardiac catheterization, electrophysiology, and structural heart treatments.

■ **THE HYBRID OPERATING ROOM (HYBRID OR)** combines real-time diagnostic imaging with advanced surgical capabilities, allowing for minimally invasive procedures that reduce recovery times and improve patient outcomes.

■ **TAVR (Transcatheter Aortic Valve Replacement)** is a minimally invasive procedure that replaces a damaged aortic valve without the need for traditional open heart surgery. It significantly reduces recovery time and is ideal for patients who are not candidates for conventional surgery.

■ **TBE / TAMBE (THORACIC BRANCH / THORACOABDOMINAL BRANCH ENDOPROSTHESIS)** are advanced endovascular options to repair complex thoracic and abdominal aortic aneurysms. Performed in the Hybrid OR, these procedures minimize surgical risks by deploying branched stent grafts through small incisions in the groin and arm, ensuring precise treatment of aneurysms involving branch vessels.

■ **WATCHMAN** device offers a minimally invasive solution for patients with atrial fibrillation who are at high risk for stroke but cannot tolerate long-term blood thinners. The implanted device effectively reduces stroke risk, providing patients with a safer, more convenient alternative to medication.

40+ Clinical Trials

For over 50 years, Guthrie's clinical trials have been a testament to our relentless pursuit of new methodologies for preventing, detecting, and treating a myriad of diseases across disciplines. Cardiology and Vascular Surgery trials involve preventive measures and/or treatments, experimental surgical techniques or devices, and/or new medicines.

For more information on Clinical Trials at Guthrie, visit <https://www.guthrie.org/clinical-trials> or email us at clinical.research@guthrie.org.

REGIONAL COMPREHENSIVE CARDIOVASCULAR CARE

Guthrie delivers expert cardiac and vascular care at 14 locations, covering 11,000 square miles. Our coordinated team continues to lead the region in innovative treatments and technology for heart and vascular health.

MISSION

Guthrie works with the communities we serve to help each person attain optimal, life-long health and well-being. We will do so by providing integrated, clinically-advanced services that prevent, diagnose, and treat disease, within an environment of compassion, learning, and discovery.

VISION

Improving Health through Clinical Excellence and Compassion; Every Patient. Every Time.
