

WHAT'S NEW...

Guthrie offers advanced cancer care throughout our 14-county service area, covering more than 11,000 square miles. Our dedication shows in our commitment to quality. This is evident through more than 80 consecutive years of accreditation by the Commission on Cancer, a quality program of the American College of Surgeons (ACS).

A QUALITY PROGRAM
of the AMERICAN COLLEGE
OF SURGEONS

4 PILLARS OF COMPREHENSIVE CANCER CARE

MEDICAL ONCOLOGY

The treatment of cancer using drug and hormone combinations delivered through oral medications or infusions.

SURGICAL ONCOLOGY

The use of surgery to diagnose, stage, and treat cancer as well as alleviate pain or complications.

RADIATION ONCOLOGY

The controlled use of ionizing radiation, delivered by one of our linear accelerators or seed implants, to control or kill cancer cells.

INTERVENTIONAL ONCOLOGY

A multi-disciplinary specialty including Interventional Radiologists and Surgical Oncologists to treat cancer and manage cancer-associated symptoms.

FY2025: Expanding Guthrie's Cancer Service and Care

11,495
Cancer Patients Treated

8
New Providers Welcomed

\$6M
Invested in Technology

NEW TECHNOLOGY

VARIAN EDGE™ LINEAR ACCELERATOR

Guthrie Sayre has added a new radiation therapy system, the Edge™ Linear Accelerator, which is superior for high-precision, high-dose applications such as SRS and SBRT, offering greater automation, accuracy and treatment workflow efficiency.

DA VINCI XI SURGICAL SYSTEM

Guthrie Lourdes installed its second da Vinci surgical robot, the da Vinci Xi, providing surgeons with improved visualization and dexterity to diagnose and treat cancer.

Welcoming New Providers in Cortland and Binghamton

Guthrie Cancer Services - By the Numbers

The 14-County Leader in Oncology and Hematology Services

Cancer Services Team

16 Medical Oncology & Hematology Providers	14 Oncology Navigators & Social Workers	11 Palliative Care & Hospice Providers	9 Interventional Oncology Providers	8 Breast Radiology Providers	7 Interventional Radiology Providers	4 Radiation Oncology Providers
---	--	---	--	---------------------------------	---	-----------------------------------

Surgical Spotlight

11 Urologic Surgeons	7 Plastic and Reconstructive Surgeons	4 Breast Surgeons	5 Colorectal Surgeons	4 Thoracic Surgeons	2 Surgical Oncology Surgeons	1 Head & Neck Surgeon
-------------------------	--	----------------------	--------------------------	------------------------	---------------------------------	--------------------------

Our teams in medical, surgical, and radiation oncology and pathology can work directly with Mayo specialists through eConsults to ask questions related to complex cases. Further collaboration is demonstrated in six multi-disciplinary Tumor Boards including breast, gastroenterology, general, head and neck, thoracic and urology.

Hematology-Oncology Fellowship Program

Giampaolo Talamo, MD
Program Director
Hematology-Oncology Fellowship

Amandeep Kaur, MD
Associate Program Director
Hematology-Oncology Fellowship;
Medical Director, Guthrie Corning Infusion Center

Guthrie's Hematology-Oncology Fellowship Program began in 2023 and is led by **Dr. Giampaolo Talamo** and **Dr. Amandeep Kaur**. Our fellows receive personalized mentorships and have access to innovative medical technologies. Their comprehensive clinical experience consists of participating in both inpatient consultations and outpatient care at multiple Guthrie sites, scheduled didactic

sessions covering the entire field of Hematology-Oncology, and several Tumor Boards. Elective rotations are in Blood Blank/Coagulation, Hematopathology, Bone Marrow Transplant/Cellular Therapy (at the Penn State Hershey Cancer Institute), Chemotherapy Administration/Pharmacy and Palliative Care.

Leading The Region in Cancer Care

40+ Clinical Trials

For over 50 years, Guthrie’s clinical trials have been a testament to our relentless pursuit of new methodologies for preventing, detecting, and treating a myriad of diseases across disciplines, including Oncology. One of our newest oncology clinical trials is the Lily Device that uses compression therapy to reduce the amount of chemotherapy reaching the hair follicles, with the aim to reduce the amount of hair lost.

For more information on Clinical Trials at Guthrie, visit <https://www.guthrie.org/clinical-trials> or email us at clinical.research@guthrie.org.

BiTE (BISPECIFIC T CELL ENGAGER) THERAPY

BiTE (Bispecific T cell Engager) Therapy is a form of immunotherapy which targets a protein on the surface of the cancer cell and brings it in close proximity to the T cell by creating a bridge between two. This allows the T cell to recognize and destroy the cancer cell.

INTERVENTIONAL ONCOLOGY

Interventional Oncology is a multi-disciplinary specialty that includes Interventional Radiologists who perform image guided procedures and Surgical Oncologists who perform minimally invasive surgery. Interventional Oncology is used to treat cancer and manage cancer-associated symptoms. Guthrie’s Interventional Oncology team is led by our board-certified and fellowship-trained specialists below.

Burt Cagir, MD, FACS
Executive Director,

GENETIC COUNSELING AND TESTING

Genetic counseling and testing is offered at all four Guthrie Cancer Centers patients diagnosed with cancer or who have a strong family history of cancer. Genetic testing can help determine when and what cancer screenings to start, if there is a higher risk for developing other cancers and if family members should be tested.

ABOUT GENETIC
TESTING

CANCER SCREENINGS

Screening remains our best tool for catching cancer early, at its most treatable stage. Guthrie offers cancer screenings in the following areas:

- Breast
- Lung
- Prostate
- Colorectal
- Skin
- Gynecology
